CONDENSED REVIEWED INTERIM FINANCIAL RESULTS FOR THE SIX MONTHS ENDED 30 JUNE 2022

BOARD LETTER TO SHAREHOLDERS

Introduction

It is our pleasure to present the condensed reviewed interim financial results for BridgeFort Capital Limited for the six months ended 30 June 2022.

Operating environment

The year-on-year official inflation rate started the six-month period under review at 61% in December 2021 and accelerated to 192% in June 2022 whilst year to date inflation stood at 119% in June 2022. Month-on-month inflation moved from 6% in December 2022 to 31% in June 2022. The official auction exchange rate to the US Dollar was 109 on 31 December 2021 and devalued to 366 on 30 June 2022 – a year to date increase of 237%.

On 7 May government announced a raft of measures including the suspension of lending, an increase in Capital Gains Tax (“CGT”) on ZSE shares to 20% or 40% depending on whether the shares were held for 270 days or less and an increase in the foreign currency intermediated money transfer tax (“IMTT”) to 4%. The CGT rates were then enacted into law on 13 May 2022 at 2% and 4% through SI 96 of 2022. On 27 June the Reserve Bank announced an increase in the bank policy rate from 80% to 200% effective 1 July. Borrowing is now totally prohibitive as the compounded annual interest rate of the 200% policy rate is 536% whilst some banks have added a margin of 30% resulting in a compounded rate of 720% - both compounded rates being significantly higher than inflation. These dramatic announcements and policy changes were apparently made to combat speculation in the market blamed for driving the parallel market exchange rate. Subsequently the authorities have placed more emphasis on their own procurement practices and prices they pay for goods whilst leaving the higher CGT and interest rates in place.

As a result of the changes highlighted above, the Zimbabwe Stock Exchange (“ZSE”) has seen significant loss of market value making it unattractive for any capital raising or other transactions. The ZSE is an important source of expansion or refinancing capital for local businesses whilst debt finance from banks is also of critical importance for the growth of the economy. Interest rates significantly higher than inflation and high IMTT transaction costs, amongst many other factors, make the economy less competitive and less attractive versus other regional countries.

The operating environment remained difficult and unpredictable during the period.

Update of changes from MedTech to BridgeFort

All required changes emanating from the extraordinary general meeting in November 2021 have been concluded.

Financial highlights

BridgeFort

The total inflation adjusted comprehensive loss for the six-months amounted to ZWL720 million, mostly made up of fair value losses due to the reduction in the real values of the class A and B shares on the ZSE.

Class A Portfolio – Consumer Goods

The Class A portfolio primarily includes 50.1% of Zvemvura Trading (Private) Limited, trading as MedTech Distribution, and Chicago Cosmetics (Private) Limited, a 51% subsidiary of MedTech Distribution. For the period under review, the business made a profit after tax of ZWL92 million of which ZWL22 million is attributable to the Class B portfolio. The business incurred a significant foreign exchange loss of ZWL456 million largely due to legacy creditors but also from credit extended by foreign suppliers – which is hedged with stock. Sales volumes increased by 24% for the six months as compared with the first half of 2021 resulting in inflation adjusted sales of ZWL1.36 billion – an increase of 74%.

These businesses primarily sell goods to retailers and wholesalers. Credit demanded by supermarkets is generally 30 days from statement for slower moving products, which is onerous in Zimbabwe's unpredictable and inflationary environment. Typically, these businesses aim to hedge the debtors' book and unlock the working capital tied up in debtors through bank borrowings, whilst pricing in the cost of finance for the credit period into the selling price of the goods. With extremely tight liquidity in the market and interest rates having been increased to prohibitive levels this is no longer feasible as the finance cost alone increases the price of goods by 44% based on interest rates of 20% per month to fund a two-month collection period. The business is experiencing delays in payments of up to a month past due from major retail chains as sales volumes in the supermarkets have been negatively affected by policy changes.

During the six months under review, there have been no payments received from the Reserve Bank for legacy debts of ZAR 17.5 million which is provided for in the MedTech Distribution accounts at the auction rate. This legacy debt continues to hamper relationships with suppliers and affects the timely supply of goods.

Class B Portfolio

The Class B portfolio comprises an effective 50.1% of the land registered in the name of MedTech Distribution which was last valued at USD200,000.

Dividend

No dividends were received from portfolio investments and hence the Directors resolved not to declare an interim dividend.

Outlook

The extremely tight liquidity prevailing in the market as a result of very high interest rates and government delays in payments to suppliers has resulted in a significant drop in demand for many businesses. The positive effect of these policies has been a reduction in inflation and a strengthening of parallel rates whilst the parallel market premiums have narrowed significantly as the official rate has devalued to more realistic levels. This reduction in arbitrage opportunities is a positive development and we hope to see a truly market driven exchange rate in future. The various requirements for and the frequency of the weekly auction is not supportive of the efficient running of businesses. The recent significant drop in inflation is commendable and for as long as government and the RBZ keep money supply under control, exchange rates are expected to remain relatively stable in the short term.

The policy interventions, apparently to protect the Zimbabwe Dollar, have resulted in such tight liquidity that the use of ZWL has decreased whilst more transactions are taking place in USD making the ZWL less relevant for many businesses, which is leading to further dollarisation of the economy. With the punitive IMTT costs, this increasing dollarisation is more of a cash dollarisation outside of the banking system which will result in less formal funding available to banks for on-lending to clients.

The 20% and 40% CGT on the sale of ZSE shares was included again in the mid-term budget presentation by the Minister of Finance on 27 July. The implementation of this would undermine trading on the capital markets, and we urge the authorities to reconsider and consult the market on the implications of such a measure. Due to the nature of BridgeFort's business, the implementation of such an onerous tax would make the conclusion of any transactions most unlikely until the tax is reversed. The announcements alone have already had a negative impact on our ability to conclude transactions.

Whilst the operating environment remains difficult and highly unpredictable, we shall continue to focus on looking for good opportunities, concluding private equity transactions and assisting underlying portfolio companies in achieving their goals.

Appreciation

We wish to extend our appreciation to all stakeholders for their continued support.

AUDITORS STATEMENT

The Company's external auditors, PKF Chartered Accountants (Zimbabwe), have reviewed the Company's condensed interim financial statements for the six months ended 30 June 2022 set out on pages 4 to 9 and have issued a qualified conclusion thereon, the basis of the qualified conclusion is as a result of a modification of the audit opinion on the December 2021 financial statements, adjustments might be necessary to the opening retained earnings and reserves in the current period interim financial results. The audit modification related to non-compliance with International Accounting Standard (IAS) 21 - The Effects of Changes in Foreign Exchange Rates in prior period and inappropriate application of IAS 8 - Accounting Policies, Changes in Accounting Estimates and Errors. The effects of this modification have not been determined by the directors. The conclusion on the review of the results of the current period are not modified in respect of International Accounting Standard (IAS) 21 - The Effects of Changes in Foreign Exchange Rates.

The financial statements were reviewed by Lewis Hussein, CA(Z), a member of the Institute of Chartered Accountants Zimbabwe (“ICAZ”), and a registered Public Auditor with the Public Accountants and Auditors Board, Public Auditor Registration Number 0347.

The full review report is included on page 11.

On behalf of the Board

S. Ncube
Company Secretary
29 September 2022

Notes to the Condensed Interim Financial Statements

4 Basis of preparation and accounting policies

The Company's condensed interim financial statements for the six months ended 30 June 2022 have been prepared in accordance with IAS 34 "Interim financial reporting". The accounting policies used in the current period are consistent with those applied in the previous period unless otherwise stated. These condensed interim financial statements have been prepared on the assumption that the Company will continue to operate on a going concern basis.

4.1 Statement of compliance

These condensed interim financial statements have been prepared in compliance with International Financial Reporting Standards ("IFRS") and IFRS Interpretations Committee ("IFRSIC") interpretations applicable and in a manner required by The Companies and Other Business Entities Act (Chapter 24:31).

4.2 Functional and presentation currency

These financial statements are presented in Zimbabwe Dollars (ZWL) being the functional and reporting currency of the primary economic environment in which the Company operates.

4.3 Hyperinflation

For the purposes of fair presentation in accordance with International Accounting Standard (“IAS 29”) “Financial Reporting In Hyperinflationary Economies”, the historical cost information has been restated for changes in general purchasing power of the Zimbabwean dollar (“ZWL”) and appropriate adjustments and reclassifications have been made. The restatement has been calculated by means of adjusting factors derived from the consumer price index prepared by the Zimbabwe National Statistics Agency (“ZimStat”). Accordingly, the inflation adjusted financial statements represent the primary condensed interim financial statements of the Company. The historical cost financial statements have been provided by way of supplementary information.

The adjustment factors used to restate these interim financial statements are as follows:

Dates	Indices	Conversion factors
30 June 2022	8 707.35	1.00
31 December 2021	3 977.50	2.19
30 June 2021	2 986.44	2.92
31 December 2020	2 474.51	3.52
Six Months 2022 Average CPI	5 719.29	1.52

2 Fair value gains through profit and loss and Investments held at fair value				
All subsidiaries and associates have a principal place of business in Zimbabwe. Whilst these companies are not directly listed on the Zimbabwe Stock Exchange, the Company has classes of shares listed which link the economic benefits of the underlying portfolio investments directly to each class of shares. As a result, the valuation of the portfolios is determinable from a listed share price and such valuation is used as the basis for the fair values of the portfolios.				
Fair value at beginning of period	1 022 138		467 703	
At cost at beginning of period		46 183		332
Fair value (losses) through profit and loss	(759 119)		(201 411)	-
Fair value gains through other comprehensive		975 955		467 371
Fair value at end of period	263 019	1 022 138	266 292	467 703
Broken down as follows:				
Class A portfolio	236 159	964 881	239 432	441 548
Class B portfolio	26 860	57 257	26 860	26 155
Total	263 019	1 022 138	266 292	467 703
Class A Portfolio – Consumer Goods				
The Class A Portfolio comprises all of the MedTech companies, made up primarily of Zvemvura Trading P/L (trading as MedTech Distribution) and Chicago Cosmetics P/L. The net asset value attributable to the Class A portfolio is made up as follows;				
Investments held at fair value	236 159	964 881	239 432	441 548
Property plant and equipment	4 573	4 616	1 300	1 312

3 Taxation				
Deferred taxation	51 338	100	23 451	34

5 Contingent liabilities

The Company had no material contingent liabilities as at 30 June 2022.

6 Going concern

The Directors assessed the ability of the Company to continue operating as a going concern and concluded that the use of the going concern assumption is appropriate in the preparation of the condensed interim financial statements. The Directors have considered the impact of the macro-economic conditions on the Company's business and are satisfied that adequate measures have been taken to ensure the viability of the Company beyond the next year.

7 Subsequent events

Subsequent to the reporting period date, there were no material adjusting or non-adjusting events.

The supplementary information presented below was extracted from the six month financial information reviewed by AMG Global Chartered Accountants (Zimbabwe).

Independent Auditors Report on Review of Interim Financial Information to the Members of BridgeFort Capital Limited for the six months period ended 30 June 2022

Introduction

We have reviewed the accompanying condensed inflation adjusted interim statement of financial position of BridgeFort Capital Limited (the company) as at 30 June 2022, the condensed inflation adjusted interim statements of profit or loss and other comprehensive income, changes in equity and cash flows for the six months period then ended, and notes to the condensed inflation adjusted interim financial results including a summary of significant accounting policies and other explanatory information as set out on pages 4 to 9.

Directors' responsibility for the condensed inflation adjusted interim financial results

The directors are responsible for the preparation and fair presentation of these condensed inflation adjusted interim financial results in accordance with IAS 34, Interim Financial Reporting and in the manner required by the Securities and Exchange (Zimbabwe Stock Exchange Listings Requirements) Rules, 2019.

Auditor's responsibility for the condensed inflation adjusted interim financial results

Our responsibility is to express a conclusion on these condensed inflation adjusted interim financial results based on our review. We conducted our review in accordance with the International Standard on Review Engagements 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity".

A review of interim financial results consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Basis for Conclusion

As a result of a modification of the audit opinion on the December 2021 financial statements, adjustments might be necessary to the opening retained earnings and reserves in the current period interim financial results. The audit modification related to non-compliance with International Accounting Standard (IAS) 21 - The Effects of Changes in Foreign Exchange Rates in prior period and inappropriate application of IAS 8 - Accounting Policies, Changes in Accounting Estimates and Errors. The effects of this modification have not been determined by the directors. Our conclusion on the review of the results of the current period are not modified in respect of International Accounting Standard (IAS) 21 - The Effects of Changes in Foreign Exchange Rates.

PKF Chartered Accountants (Zimbabwe) is a member firm of the PKF International Limited network of legally independent firms and does not accept any responsibility or liability for the actions or inactions on the part of any other individual member firm or firms.

Qualified Conclusion

Except for the adjustments, if any, to the interim financial information that we might have become aware of had it not been for the situation described above, based on our review, nothing has come to our attention that causes us to believe that the accompanying interim financial information is not prepared, in all material respects, in accordance with IAS 34, Interim Financial Reporting and in the manner required by the Securities and Exchange (Zimbabwe Stock Exchange Listings Requirements) Rules, 2019.

Other Information

The Directors are responsible for the other information. The other information comprises the Board letter to Shareholders and the financial information in the condensed inflation adjusted interim financial results titled “historical cost” and “historical cost unaudited” and the supplementary information extracted from the six month financial information reviewed by AMG Global Chartered Accountants (Zimbabwe), but does not include the condensed inflation adjusted interim financial results and the review report thereon.

Our conclusion on the condensed inflation adjusted interim results does not cover the other information and we do not express a conclusion or any form of assurance conclusion thereon.

In connection with our review of the condensed inflation adjusted interim financial results, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the condensed inflation adjusted interim financial results or our knowledge obtained in the review, or otherwise appears to be materially misstated. If, based on the work we have performed on the other information, we conclude that there is a material misstatement of this other information, we are required to report that fact.

REPORT OF THE INDEPENDENT AUDITORS TO THE MEMBERS OF ZVEMVURA TRADING (PRIVATE) LIMITED T/A MEDTECH DISTRIBUTION and its subsidiaries

Modified review conclusion on interim financial information

We have reviewed the consolidated financial statements of Zvemvura Trading (Private) Limited t/a Medtech Distribution (“the Group”) comprising:

- Group and Company’s statements of profit or loss and other comprehensive income, Group and Company’s statements of changes in equity and consolidated statements of cash flow for the six months ended 30 June 2022;
- Group and Company’s statements of financial position as at 30 June 2022;
- A summary of the significant accounting policies applied by the Group and Company during the six months ended 30 June 2022; and
- Notes on the financial statements.

Based on our review, with the exception of matter described in the basis of modified review conclusion paragraph below, nothing has come to our attention that causes us to believe that the accompanying interim financial information does not give true and fair view of the financial position of the Group and Company as at 30 June 2022, and of the Group and Company’s financial performance and cash flows for the six month period then ended in accordance with International Financial Reporting standards.

Scope of review

We conducted our review in accordance with International Standards on Review Engagements 2410, “Review of interim financial information performed by the independent auditor of the entity. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Basis of modified review conclusion

The Group transacts a significant amount of business in foreign currencies (especially in the procurement of raw materials and goods for resale), and had significant foreign currency denominated assets and liabilities in its statement of financial position as at 30 June 2022. During this period, the Group was unable to comply with the requirements of IAS 21 The Effects of Changes in Foreign Exchange Rates in the recognition and measurement of foreign currency denominated transactions and balances in its accounting records, as well as the presentation and disclosure of same in its financial statements. Also, the audit report for the year ended 31 December 2021 was modified due to the impact of non-compliance with IAS 21.

With respect to prior year figures, management has not made retrospective adjustments in terms of IAS 8 to correct these matters. As a result, corresponding amounts on the Group Statement of Profit or Loss and Other Comprehensive Income, the Group Statement of Cashflows, Accumulated Profit, Non-controlling interest and Deferred Tax liability on the consolidated Statement of Financial Position remain impacted.

Director's responsibility for the financial statements

The Company's directors are responsible for the preparation and fair presentation of these interim financial statements in accordance with International Financial Reporting Standards. This responsibility includes:

- Designing, implementing, and maintaining internal control relevant to the preparation and presentation of interim financial statements that are free from material misstatement, whether due to fraud or error;
- Selecting and applying appropriate accounting policies; and
- Making accounting estimates that are reasonable in the circumstances.

Auditors' responsibility for the financial statements

Our responsibility is to express a conclusion on the interim financial statements based on our review. The engagement partner on the review resulting in this review report is Clyton Kazembe, Registered Public Auditor – PAAB Practising Certificate number 0372.
